## GENERAL

## Discover Weekly Reaches Nearly 5 Billion Tracks Streamed Since Launch

Posted on 2016/05/25 by [The Spotify Team](#)

Discover Weekly is a playlist of songs that Spotify's algorithm thinks you'll like. It's a mix of new and old music, and it's always changing. Since we launched it, it's been a huge success. It's now one of the most popular playlists on Spotify, and it's reached nearly 5 billion tracks streamed. We're proud of what we've achieved, and we're excited to see what the future holds for Discover Weekly.

Music, meet code. Powerful APIs, SDKs and widgets for simple and

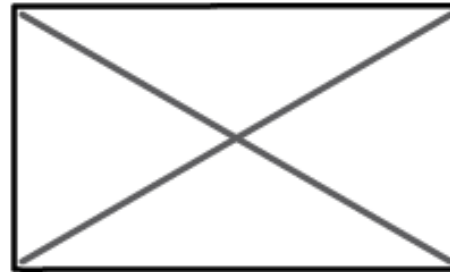

## Spotify Web API

Access Spotify's music catalog and user data from your web application. The Spotify Web API is a RESTful API that allows you to interact with Spotify's data. You can search for music, get information about artists, albums, and tracks, and manage your user's library. The API is available in JSON format and can be accessed from any web browser.

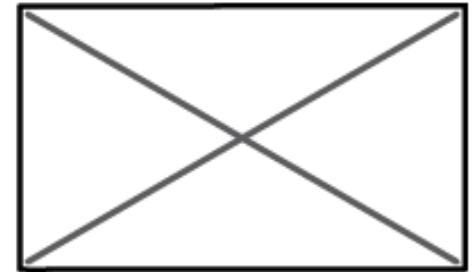

## Web API Console

The Spotify Web API Console is a web-based interface that allows you to interact with the Spotify Web API. It provides a simple and intuitive way to explore the API and test your code. The console is available at [https://developer.spotify.com/console/](#).

## Spotify Play Buttons

Spotify Play Buttons are a set of HTML and CSS code snippets that allow you to embed Spotify's music player into your web application. They are easy to use and can be customized to match your application's design. The play buttons are available in a variety of sizes and colors, and can be used to display a single track or a full playlist.

## Spotify iOS SDK

The Spotify iOS SDK is a software development kit that allows you to integrate Spotify's music player into your iOS application. It provides a set of APIs and classes that make it easy to search for music, get information about artists and albums, and manage your user's library. The SDK is available for free download from the Spotify Developer website.
